

**Type:** Barrel shape

**Version:** INTERACTIVE

**as of:** 03/07

### Materials used

- Steel wire for springs DIN EN 10270 – dimensions 1.8+1.15 and 2.0+1.27 mm (15+18½, 14+17¾ gauge)
- Needle punched fibre: 80% Polyester / 20% Polypropylene

alternatively: 1 or 2 flat strip border frames 10x1.4 mm

### Specification

<b>No. of turns:</b>	6 ½ + 8	<b>Shape of coils:</b>	barrel
<b>Coil diameter:</b>	60+40 mm (2.4"+1.5")	<b>Core heights:</b>	8/13/14.5/16 cm (3", 5", 5.5" 6.2")
<b>Course of strands:</b>	crosswise	<b>1000S spring:</b>	6/10/12/12.5 cm (2.4", 4", 4.7", 5")
<b>Pockets:</b>	u.s. welded		
<b>Connecting-System:</b>	strands of springs are centrally glued using hot melt adhesive		

### Standard-sizes and coil count

**86x179 cm – 13x23 + 12x22 = 563 coils**  
**93x187 cm – 14x24 + 13x23 = 635 coils**

**132,5x187 cm – 20x24 + 19x23 = 917 coils**  
**152,5x187 cm – 23x24 + 22x23 = 1058 coils**

### Product Description

The pocket spring unit has a particularly complex form of springing, since each individual coil is worked into either a fabric or non-woven pocket. The pocket spring units are renowned for being extremely comfortable and quiet. All of Argo's spring units are manufactured using only the highest quality raw material.

Due to the central gluing system, all Punkttoflaex units have an excellent point of elasticity. The entire family of Punkttoflaex units are built around this system.

The NEW **INTERACTIVE** model was developed to offer a very sensitive innerspring construction. The alternatively positioned rows of springs create an initial soft feeling to the mattress, and then as the body sinks deeper into the unit and comes into contact with the lower height pockets, the mattress becomes firmer and supports the entire body. This provides excellent "Progressive" spring support to the spine and is the basis for a deep and restful sleep. The nested coil configuration exhibits an excellent material density. With over 900 springs per Double/Full size mattress we have created a spring unit, which fulfils the criteria for the production of a superior mattress.

### Produkteigenschaften und Vorteile:

- Ergonomical coil construction
- Very good elasticity by over 900 springs in an Double/Full size mattress
- Excellent contouring to the body`s shape by alternating spring heights
- „progressive“ spring support – soft top feeling
- suitable for all adjustable beds
- extraordinary flexibility by exclusively central glueing
- Multiple-zoned versions are available
- new kind of lounging comfort by means of alternating coil heights and diameters in one core
